

# Charlotta Lindberg

## Frontend developer with .NET experience

As a frontend developer, I enjoy combining technology with creativity and structure. I thrive both in team environments and when working independently. I believe it's important to contribute to a positive and supportive atmosphere at work. What draws me to IT is the constant opportunity to learn, solve real-world problems, and create digital experiences that truly make a difference.

## Internship

### Aboveo

#### Frontend developer

JavaScript, CSS, SVG

### Signifikant

#### .NET developer

LESS, Razor Pages

### Just Value

Webdesign

Wordpress, SEO

## Knowledge

- Javascript (React, TypeScript)
- C#
- HTML
- CSS (LESS, SCSS)
- SQL, Database management
- GIT
- SEO , Accessibility
- CMS (Strapi, Wordpress)
- Figma, Trello
- Postman

## Language

- Swedish
- English

## References

Can be provided on request

## Experience

### Aboveo – Dec 2024 - Dec 2025

Their services aim to boost customer engagement and sales through innovative marketing tools. I created custom components to enhance user interaction, such as progress bars and interactive games – fully tailored to the client's needs.

See examples of my work, including an interactive game, on [CodePen](#).

### Signifikant – Jan 2023 - Aug 2023

Efficient management of aftermarket information. I helped "clean up" the user interface and frontend code on clients' administrative websites and created new pages.

One of my biggest takeaways was learning how to navigate a large codebase and developing strong skills in CSS.

## Education

### 2023 - 2025 Graduated

#### Frontend developer

**Nackademin, Stockholm**

An education in frontend programming focused on developing concrete skills that directly meet industry needs. The program included in-depth knowledge of the programming languages Javascript, HTML, and CSS, with a special focus on accessibility and responsive web design. We also explored the use of graphic tools such as Figma and learned how to integrate frontend with backend.

#### Thesis Project:

As part of my frontend education, I created a functional website that allows users to submit text, images, and audio files via email. The project demonstrates my ability to build a full-featured and accessible user interface, handle file input, and integrate backend services for email communication. My focus was on creating a user-friendly and secure submission process using modern JavaScript practices, responsive design, and accessibility principles. This project showcases my skills in problem-solving, technical implementation, and end-to-end development.

### 2021 - 2023 Graduated

#### .NET developer

**IT - Högskolan, Stockholm**

#### Courses

- Programming with C#
- Database development and administration
- Web development with C#
- Agile workflow
- Customer understanding, consulting and reporting
- Clean Code and refactoring
