Charlotta Lindberg
Frontend developer with .NET experience

As a frontend developer, I combine coding skills with the ability to work effectively in teams or independently. I take initiative, plan my work well, and strive to foster a positive team atmosphere.

In previous roles and during my education, I've been the one to sense team dynamics and address challenges, which inspires me to aim for future roles as a Scrum Master or project manager.

I chose development because it combines creativity, problem-solving, and continuous learning—allowing me to build solutions and grow in a dynamic field.

Education

2023 - Ongoing
Frontend developer
Nackademin, Stockholm

An education in frontend programming focused on developing concrete skills that directly meet industry needs. The program included in-depth knowledge of the programming languages Javascript, HTML, and CSS, with a special focus on accessibility and responsive web design. We also explored the use of graphic tools such as Figma and learned how to integrate frontend with backend.

2021 - 2023 Graduate
.NET developer
IT - Högskolan, Stockholm
Courses

- Programming with C#
- Database development and administration
- Web development with C#
- Agile workflow
- Customer understanding, consulting and reporting
- Clean Code and refactoring

Thesis:
The thesis report describes my work on improving and refactoring the codebase of an administrative section of a client's website. The goal was to create a more maintainable, scalable, and reusable codebase. By applying principles and techniques of design patterns and modern development processes, I have achieved higher code quality and an enhanced user experience.

Internship

Adoveo dec 2024 – Present
Offers solutions that enable customers to engage directly with advertisements through features such as purchasing directly from banners, participating in quizzes, or playing games. Their services aim to enhance customer engagement and drive sales for businesses through innovative marketing tools.

Signifikant jan 2023- apr 2023 & summer 2023

Effective management of aftermarket information. I "cleaned up" their user interface and frontend code on the clients' administrative site. The biggest lesson I have taken with me is to find in a large codebase and feel safe working with CSS.

Just Value aug 2022 - nov 2022

Delivers services in SEO, websites and digital marketing. I learned Wordpress and search engine optimization.
